## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Group II claims 7-10 in the reply filed on 7/03/2006 is acknowledged. The traversal is on the ground(s) that the search and examination for the entire application would not amount to a "serious burden". This is not found persuasive because a new search in a different classification would be needed for the distinct invention of the apparatus.

The requirement is still deemed proper and is therefore made FINAL.

### ***Allowable Subject Matter***

2. Claims 7-10 are allowed.
3. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
4. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or disclose a process for reclaiming waste oil by thermal cracking in a vessel at temperatures ranging from 300 to 350 degrees C until about 50% of the waste oil goes through thermal cracking and then stopping heating and applying vacuum pressure to the vessel and removing the vacuum pressure when about 70 % of the waste oil goes through thermal cracking.
